EMBROIDERED MOBILE CASE

Mobile bag embroidered

Inspired by the computer game "Tetris", I have embroidered this mobile bag. Here you get the "pattern" on the mobile bag - click on the link below.

Use your leftover yarn (here embroidery-yarn) and follow the pattern. You can vary the color mix depending on what yarn and colors you have.

You can make your own pattern as you go - by embroidering squares. If you want to download my pattern, click on the link here:

Finished size: 10 x 27 cm

Use whatever yarn you have on hand/left over from something else. Mix the colors according to taste.

Install as follows:

The embroidered work is folded in half. Sew the sides together on a sewing machine. 1.5 cm down the work, you leave a small opening through which the cord must pass - on each side.

Cut a bag with the same dimensions - remember the seam allowance and sew it together. Leave an opening for string in the same place as the embroidered work - both sides.

Sew the inner bag and outer bag together - wrong side to wrong side, so that the nice side faces out.

Insert string (leather string or waxed cotton) through both layers. Tie a knot on the outside and leave a piece hanging for decoration.
